

# RETRO-FIT KIT

BETTER AT **EVERY** LEVEL.

WWW.BUILTSYSTEMS.NET

Giving customers what they want is the slogan for most companies, but sometimes that's very complicated. Sometimes custom designs, special projects and one-of-a-kind bases are too expensive to re-create. BUILT has created a solution that does not break the bank. Our bolt-on retro-fit kit allows nearly any fixed height base the possibility of height adjustment. Using rigid, cold rolled, heavy gauge steel, along with a patented column guide system, this kit gives existing bases 1500lbs of lifting capacity, making work centers more "people" friendly. All mounting hardware and fasteners are provided, the rest is up to you.

## SPECIFICATIONS
